FRUIT

APPLE, COLUMNAR

They have a compact, upright, narrow growth habit and mature to be about 8-10 feet tall and 18-24 inches wide. This makes them perfect for growing in containers on balconies and patios, or planting in smaller yards and gardens. Zone 4-7

APPLE, ENTERPRISE

Firm and crisp, with a spicy aroma and mild tartness. Extremely disease-resistant to apple scab, cedar apple rust and fire blight; moderate resistance to powdery mildew. Keeps 5-6 months if refrigerated. Cold-hardy. Ripens in mid-October. Best pollinators: any Golden Delicious or Gala. Zone 4-7

APPLE, FUJI

Super Red Fuji is a sweet, crisp, drippy-juicy apple that has a rich, deep, scarlet color, and is gorgeous in salads and on platters. It retains its crisp character, even at room temperature. Resistant to scab and mildew. Ripens in late October. Best pollinators: Granny Smith or Grand Gala. Zone 4-8
**APPLE, GALA**

Looks as good as it tastes! These apples feature gorgeous, shiny, red-striped skin that colors early. This variety is sweet, aromatic and juicy, and the perfect size for snacking. Also delicious in crisps, cobblers and pies. Pest- and disease-resistant. Ripens in late August or early September. Best pollinators: Super Red Fuji, Red Delicious or any Golden Delicious. Zone 5-8

![Apple, Gala](image1.jpg)

**APPLE, GOLD RUSH**

This dessert-apple tree is disease-resistant to apple scab and powdery mildew. Fruit has a tart, tangy flavor that sweetens with age. Excellent fresh or in pies and crisps. Ripens in mid- to late-October. Best pollinators: Jonafree, Red Fuji or Enterprise. Zone 5-8

![Apple, Gold Rush](image2.jpg)

**APPLE, GRAND GALA**

A premium dessert apple. This larger version of the Gala gives you more sweet bites to savor. Great for all uses. Resists cedar apple rust. Ripens in late August. Best pollinators: Super Red Fuji, Red Delicious or any Golden Delicious. Zone 5-8

![Apple, Grand Gala](image3.jpg)
APPLE, GRANNY SMITH

APPLE, HONEYCRISP

APPLE, JONAFREE
This vigorous variety is disease-resistant to apple scab and less susceptible to diseases, like mildew, rust, and blight, than other Jonathans. Bears heavy crops of fruit with low-acid Jonathan flavor. Ripens in mid-September. Best pollinators: GoldRush or Enterprise. Zone 5-8
**APPLE, JONAGOLD**

Unique flavor makes the fruit luscious enough to serve by itself as dessert. This crisp super apple is a cross between the tart Jonathan and the sweet Golden Delicious. The result is a tasty treat for all. Ripens in mid-September. Best pollinators: Jon-A-Red® Jonathan or any Golden Delicious. Zone 5-8

**APPLE, JONATHON**

These medium-sized, round apples have such a compelling sweet-tart taste that they are now one of the most commercially-produced apples in the United States. Perfect for pie. Fruit features a bright red color and a classic Jonathan sweet-tart taste. Make flavor-filled pies, cider and old-fashioned candied apples. Ripens in mid-September. 12-15 feet tall and wide. Self-pollinating. Zone 5-8

**APPLE, LIBERTY**

Tree is low-maintenance due to its resistance to apple scab, cedar apple rust, fire blight, and powdery mildew. Fruit has a yellow background with attractive red overtones, a crisp white flesh, and a harmonious sweet-tart taste. Perfect for fresh-eating, cooking, canning, or keeping. Cold-hardy. Ripens in early September. Best pollinators: Cortland, Freedom, or Ultra Mac. Zone 4-7
<table>
<thead>
<tr>
<th><strong>APPLE, LODI</strong></th>
<th>The “early bird” of the orchard. Be the first in your neighborhood to enjoy homemade pies, cider and applesauce. While similar to Yellow Transparent, these apples are larger and keep better. Resistant to powdery mildew. Cold-hardy. Ripens in July. Best pollinators: Cortland, Brae Star or Ultra Mac. Zone 4-8</th>

<tr>
<td><strong>APPLE, MCINTOSH</strong></td>
<td>Moderately large fruit with an appetizing apple aroma. Tree is a vigorous grower and a precocious bearer. Fruit is vibrant-red, thin, and peels easily and flesh is tender with a sprightly sweet-tart taste. Wonderful apple for fresh-eating, sauces, and cider. Good keeper in proper storage. Cold-hardy. Ripens in August. Best pollinators: Cortland, Brae Star or Lodi. Zone 4-8</td>
</tr>
<tr>

<td></td>
</tr>
<tr>
<td><strong>APPLE, PRISTINE</strong></td>
<td>A great storage apple with a smooth finish. Features canary yellow skin, often with a blush. Flavor is somewhat tart, but excellent for cooking or eating fresh. Early-summer apple. Medium to large fruit. Best pollinators: Cortland, Grand Gala or Jon-A-Red Jonathan. Zone 5-8</td>

APPLE, RED DELICIOUS

Many orchards plant this spur-type tree because of its highly productive nature — it produces bushel after bushel of picture-perfect 4” red apples. Cold-hardy. Ripens in late September. Best pollinators: Jon-A-Red Jonathan, Red Rome Beauty or any Golden Delicious. Zone 4-8

APPLE, ROYAL EMPIRE

The Royal Empire Apple tree is a moderately growing fruit tree. Royal Empire is practically the same cultivar as a normal Empire Apple. The only difference is the Royal Empire’s apples are a darker red. The fruit ripens in late September to early October. Grows up to 16 feet tall and 14 feet wide. Zone 4-7

APPLE, RUBY JON

Completely blushed solid red in early August in Missouri, 10 days before any other strain, and more than three weeks before the parent variety attains adequate color for harvest. When allowed to mature before picking, color approaches that of Arkansas Black. Zone 5-8
APPLE, ULTRA GOLD

The Ultra Gold Apple tree is a moderately growing fruit tree. Can grow up to 25 feet tall and wide. Ultra Gold is a new variety of Golden Delicious. Ultra Gold’s fruit is russet resistant, better storage life, and is less susceptible to shriveling than other apple cultivars. Zone 5-8

APPLE, WILLIAMS PRIDE

Early maturing attractive, dark red apple with excellent tart fruit quality and immunity to apple scab. Extremely resistant to cedar apple rust and fire blight. For an out-of-hand apple this is the best for so early in the season. It blooms over a long span and produces annually. Zones 4-8.

BERRY, GOJI

Long arching stems feature silver-green foliage, lavender flowers, and brilliant red-orange fruit. Goji berries are high in antioxidants. Enjoy fresh or dried as a healthy addition to salads, smoothies, salsa, and more. Cold-hardy and heat-tolerant. Ripens starting in July through first hard frost. Self-pollinating. Zone 3-10
**BLACKBERRY, DARROW**

Sweet Darrow Blackberry bushes are very thrifty, vigorous growing bushes that are exceptionally hardy -- having withstood temperatures of 22 below zero. The bushes are upright with very strong canes, being able to hold up a heavy crop without breaking down. Zone 5-9

![Blackberries](image1.png)

**BLACKBERRY, NAVAHO**

The first thornless blackberry with an upright growth habit. It blooms in spring and ripens mid-June. This shrub produces an excellent berry that is flavorful, firm and sweet. It grows 4 to 5 feet tall and 3 to 4 feet wide and is very winter hardy. Zone 5

![Blackberries](image2.png)

**BLACKBERRY, TRIP. CROWN**

A unique flavor that has garnered rave reviews! This productive plant yields berries that offer a tasty blend of sweetness and tartness. The fruit is borne uniformly, so it is easy to pick. Heat-tolerant. Ripens in early August. Self-pollinating. Zone 5-9

![Blackberries](image3.png)
CHERRY, MONTMORENCY
The Montmorency Cherry Tree produces the United States most popular sour cherry. It is considered the very best cherry for making pies. This highly prized cherry tree will welcome spring with brilliant, snow-white flowers in spring followed by a great number of clusters of red sour cherries in July. Zone 4-8

CHERRY, NORTH STAR
A heavy producer. The number of deliciously tart cherries from one of these trees will amaze you. The fruit is perfect for any number of dessert recipes. The sturdy, vase-shaped tree is disease-resistant and cold-hardy. Bears just a few years after planting. Ripens in mid-June. Self-pollinating. Zone 4-8

PEAR, LUSCIOUS
The Luscious Pear produces a medium to small bright yellow pear with a beautiful red blush. The fruit is very juicy, and deliciously sweet. A very vigorous grower, it will mature at a height of 20-25 feet. It is considered a mid-sized tree that will really reward you when planted in full sun. It also prefers well drained soil. Your Luscious Pear is fireblight resistant and extremely hardy, as low as minus 50 degrees. Zone 4-8
PEAR, SUMMERCRISP
Green, with a dramatic red blush, Summercrisp pears present a charming appearance on the mid-August pear tree. Its fruit has a crisp, juicy texture and mildly sweet flavor that is prized for a variety of uses. Blooming earlier than most pear trees, Summercrisp’s decorative nature is a bonus. It even requires less space due to its slightly smaller stature. Growth habit is 20 feet high and 18 feet wide. Zone 4-8

RASPBERRY, AUT. BRITTON
The berries are long, conical shaped, with bright red color and good flavor. Autumn Britten has a good upright growth habit. Plants are moderately vigorous, and we recommend planting at 22”-24” in-row spacing. The berries are versatile and can be used as fresh fruit, in preserves, or in pies and pastries. Zone 4-8

RASPBERRY, BRISTOL
This all-purpose fruit is large, firm and gorgeous. Vigorous, upright canes do not require staking. Cold-hardy. Mid-summer bearing. Ripens in July. Self-pollinating. A licensed variety of Cornell University. Red, Gold and Purple Raspberries and Blackberries should not be planted within 75 to 100 feet of Black Raspberries. Zone 4-8
