

VIBURNUM

ALLEGHANY

Attractive, dense upright grower makes a great hedge, screen or windbreak. Large clusters of fragrant white flowers followed by showy red fruit that matures to black. Evergreen. Deciduous below 0 Fahrenheit. **Fast grower, up to 10 feet tall.** Full sun to part shade
Zone 5-8

AURORA

This Korean spice viburnum cultivar is a slow-growing, upright, rounded, deciduous shrub which typically **matures to 4-5' tall but may reach a height of 8'** in optimum growing conditions. Red buds open in late March/early April to pink-changing-to-white flowers which are arranged in snowball-like clusters. Flowers are very fragrant. Foliage usually turns dull red in fall, but may sometimes display attractive shades of wine-red to burgundy. Full sun to part shade Zone 4

AUTUMN JAZZ

A superior plant with a graceful, upright, vase shaped habit. Creamy-white, flat-topped cymes in early June followed by clusters of metallic blue-black fruits from late August through October. Foliage is medium green with shades of red. Fall color is a kaleidoscope blend of yellow, orange, red, and burgundy. **10 feet tall and 8 feet wide.** Full sun to part shade Zone 3

BRANDYWINE

A striking shrub with glossy green foliage that turns a dark, maroon-red in autumn. A profusion of berries with changing colors from greens to pinks and blues start in fall and persist well into winter. **Will grow to 5 to 6 feet tall with a spread of 4 to 5 feet.** Full sun to part shade Zone 5

C.A. HILDEBRANTS

Compact and sturdy, it will grow **only 4 feet tall** and holds its large trusses of bright red fruits late into the winter. Autumn colors range from amber to reds and maroons and makes a very impressive display. Full sun Zone 5

CARDINAL CANDY

Large clusters of shiny, scarlet-red fruit adorn this Viburnum with improved hardiness. Tons of creamy-white flowers cover the well-branched, rounded plant in May. **Matures at 5 to 8 feet tall and wide.** Fruits well even without a nearby pollinator. Full sun to part shade Zone 4

CAYUGA

Produces abundant blooms with pink buds that open up to white flowers in May. Dark green, shiny, medium textured foliage during summer. Rounded, dense shrub with stiff upright branches. **Matures at 4-6 feet tall and 4-5 feet wide.** Full sun to part shade Zone 5-8

CHICAGO LUSTRE

An outstanding upright-rounded habit with glossy dark green foliage. Creamy white flowers appear in mid to late June, followed by ornamental clusters of blue-black fruit in autumn. Extremely wet sites should be avoided. This fast growing Viburnum grows **10 to 12 feet in height with an 8 to 10 foot spread** in 10 years. Full sun Zone 5

COPPER RIDGE

The Copper Ridges Viburnum forms a dome shaped, compact shrub with dense, spreading branches. The leaves are heavily textured, densely serrated. The new leaves emerge with a copper tint. White flowers emerge in late spring and form 2-3" clusters. Fruits are scarlet red, changing to black as they mature. Copper to dark maroon fall foliage. Forms a lovely spring hedge or border. **It will grow 5-8' tall with a spread of 4-7'.** Full sun to part shade Zones 5 to 8. Cold resistant.

EMERALD TRIUMPH

This is a compact, rounded, deciduous shrub that typically **matures to 6-8' tall and as wide**. Showy white flowers in flat clusters bloom in late April-May. Flowers give way to fruits that mature to bright red in late summer but turn black by autumn. Leathery, glossy dark green leaves turn bronze to dark red in fall. Full sun to part shade Zone 4

ESKIMO

its semi-evergreen foliage in warm winter climates. This is a compact shrub (deciduous in St. Louis) that typically matures to 4-5' tall and as wide. Showy white flowers bloom profusely in snowball inflorescences in May. Flowers give way to fruits that mature in late summer to red then black. Ovate, leathery, glossy dark green leaves turn attractive shades of yellow, orange and red in fall. **Grows 5 feet tall and wide**. Full sun to part shade Zone 6-8

FRAGRANT

This viburnum is a hardy, medium sized deciduous shrub with a rounded form. Beautiful clusters of extremely fragrant pinkish-white blossoms appear in late spring. The dark green foliage, along with black fruit in fall, and its purple color in fall will provide many seasons of interest. **Grows to 8 feet tall and 10 feet wide**. Full sun to part shade Zone 4-9

JUDDI

It is a rounded deciduous shrub that typically matures to **6-8' tall and 6-10' wide**. It is noted for its sweet fragrant white flowers in spring, quality dark green foliage, and black fruit in fall and purple fall color. Full sun to part shade Zone 4

KILIMANJARO

Upright, narrow form is perfect for small spaces. White blooms appear from top to bottom. Deciduous, heavy-flowering plant is heat tolerant and low maintenance. Red fruit in mid- to late-Summer. **Grows to 8 feet tall and 3 feet wide**. Full sun Zone 5

KOREAN SPICE

A small deciduous shrub **grows to 5 feet tall** with a rounded form and an upright open branching habit. Clusters of fragrant white flowers open from pink buds in spring. Red fruit turns black in summer. Prefers slightly acidic soil. Full to part sun Zone 5

LEATHERLEAF

An evergreen shrub, commonly called leatherleaf viburnum, which can ultimately reach a **height of 6-10'**. Produces flat cymes of creamy white flowers in the spring and berries in early fall which first appear red and then change to a glossy black. Berries will often persist to the end of December. Full sun to part shade Zone 5

MARIESII

Hardy, medium growing deciduous shrub to **6 feet in height** with slightly greater spread. Large panicles of pure white flowers borne in June make this one of the most elegant flowering shrubs. Excellent when used as a screen or specimen. Full sun to part shade Zone 5

MOHAWK

A dense, compact plant that grows to **5 feet high and wide**. Pale cream buds open to pure white snowballs of flowers. Full to part sun Zone 6

MOLLY SCHROEDER

An outstanding pink flowering selection **growing 8' tall and 5' wide** with horizontal branching. Inflorescence consists of an outer ring of sterile pink flowers with creamy-white variation with a darker cream throat. Inner fertile flower buds are green, opening pink, then turning white. Full sun to part shade Zone 5

POPCORN

Amazing snow white popcorn-like cluster of flowers bloom along the branches in spring. A dense upright multi-stemmed shrub with horizontal branching matures at **5 to 8 feet tall and 4 to 7 feet wide**. Has attractive red to burgundy autumn color. Full sun to part shade Zone 5

PRAGENSE

This hybrid viburnum is an evergreen, multi-stemmed shrub that typically **grows 8-12' tall with a similar spread**. Flat cymes of slightly fragrant, creamy white flowers in spring gives way to berries in early fall which first appear red and then change to glossy black. Berries will often persist to the end of December. Elliptic, dark green leaves. Full sun to part shade Zones 5-8

PRAIRIE CLASSIC

The Prairie Classic Viburnum is a naturally occurring tree-form viburnum. The leathery green foliage shows good disease resistance. Abundant inflorescences of flat topped cymes bloom in spring. These attractive blooms are followed by fruits that mature to black in fall. Red, yellow, green and maroon fall foliage. It will grow **14-16' tall with a spread of 6-8'**. Heat and drought tolerant. Cold hardy. Humidity tolerant. Full to part sun Zone 4

RED FEATHER

As the new foliage ages, green veins appear on the red surfaces, giving the leaves a colorful, feather-like design. Red Feather has an outstanding, long lasting, maroon fall color, and its autumn color is consistent from year to year. White flowers appear in June, followed by blue-back berries in the fall. It prefers loamy, well-drained soil but tolerates dry conditions, **grows 8-10 feet tall and 10-12 feet in width.** Sun to part shade Zone 3

SENECA

A large shrub with dark green foliage growing **15' to 20' high and nearly as wide** making it a good candidate when grown as a single or multi-stemmed ornamental tree. Massive creamy-white flowers bloom May to early June followed by orange-red fruits progressing to blood-red, finally maturing to black. Full sun to part shade Zone 4

SNOWFLAKE

An introduction from the University of British Columbia of a semi-dwarf double file Viburnum that **grows 6 to 8 feet tall and 8 to 10 feet wide**. The lovely white flowers bloom almost continuously all summer in flat clusters, and reddish fruit appear in winter. Full sun to part shade
Zone 5

SUMMER MAGIC

This upright-rounded blackhaw is ideal as a specimen or small tree. It **matures at 12-15' and 10-12' wide** and is more compact. Selected for its attractive new growth of red leaves, changing to pink, maturing to a leathery mauve green. Fall foliage is a spectacular display of red and yellow. Full sun to part shade. Zone 4

WINTERTHUR

A striking, dense, compact shrub, has exceedingly shiny waxy foliage that turns red to reddish-purple in the fall. **Mature height is 6 feet**. Creamy white clusters of tiny flowers appear in June to July, followed by autumn fruit clusters ranging from pink/red to blue/black. Full sun to part shade Zone 5
